

SMARTER CONSTRUCTION. CLOUD-BASED ERP.

# eCMS v.4.2

eCMS CLOUD ERP FOR ALL YOUR CONSTRUCTION BUSINESS NEEDS

## What's New in eCMS v.4.2

- Sophisticated, Flexible and Open Technology Platform
- Robust User Interface and Navigation
- Full-Blown Financial Reporting
- Enhanced IDI Reporting
- Expanded Payroll and HR
- Advanced eCMS Field App
- Additional Mobile Forms

## Application Overview

eCMS Construction Cloud ERP is built on a single-database platform and offers a completely integrated suite of applications, including advanced business intelligence and analytics, enterprise content management and workflow, mobile field applications and more, that users access through a secure Web browser on any device, anytime and anywhere to accomplish their mission-critical tasks, collaborate across the enterprise and manage their financials and operations on demand.

Computer Guidance Corporation has been the leader in delivering construction-specific financial and project management solutions that are not only customizable to meet the unique needs of commercial contractors, but that are also scalable and flexible enough to support and facilitate companies experiencing or planning for exponential growth and market segment expansion. Our mission remains to help our customers achieve greater efficiency and productivity by bringing innovative solutions to market that support their digital transformation. It is in that spirit that CGC has released the next generation of eCMS Construction Cloud ERP—eCMS v.4.2.

## **Sophisticated, Flexible and Open Technology Platform**

- Browser-agnostic and device-independent ERP system technology platform

## **Robust User Interface and Navigation**

- Enhanced Dynamic Launchpad architecture allows users to display customized, business-critical data at system startup, which can be mined and explored with ease
- Refined User Interface enables easier navigation with a vertical menu that drills into options quicker on mobile devices while still offering configuration preferences for desktop/laptop users
- Streamlined Approval Queue allows users to approve items with a single tap on the “count” to select, view and approve (zoom in/out for additional detail with a single tap/click)
- Advanced Profile options offer shortcuts, tools, settings and links via profile icon or photo
  - Recently Viewed offers up the user’s 10 most recently used/viewed menu options
  - Favorites displays the user’s favorite menu options
  - Tools promote the set of applications most often utilized by the user
  - Settings provides options for profile picture, default dashboard, searches and more
- Enhanced Advanced Search menu options and robust data elements displays most relevant information and identifies the data type with an icon (contact, job, company, menu option)
- Adaptive Branding allows user to customize eCMS with logo and background image

## **Full-Blown Financial Reporting**

- Consolidated Financial Statements include Income Statements and Balance Sheets with advanced formatting capability such as bolding and underlining
- Interactive Financial Statements allow users to tap into displayed data fields for more details
- Financial Reports are exportable to Microsoft Excel

## **Enhanced IDI Reporting**

- Allows additional formatting, subtotaling, level brakes and exporting to Microsoft Excel

## **Expanded Payroll and HR**

- New US Tax Tables and Features for Federal and States (Alabama, Arkansas, Oregon)
- New Copy Tax Table Options increased to 20 rows
- New Federal & Local Minimum Wage capabilities
- Breakouts for FICA Social Security and Medicare, employee and employer, and furloughs
- New Fields for Personnel Data
- New Enrollment Option is no longer benefit specific
- Enhanced ACA Reporting

## **Improved eCMS Field App**

- New browser-agnostic and device-independent Field User Platform
- Remote user access to critical tools such as eCMS Forms and eCMS Online Forms
- Field Data Collection for Time Sheets, Work Orders (Daily, Service, Equipment), Purchase Requisitions, Safety Forms, COVID-19 Checklists and more
- Supports Project-Specific Content Management, including invoice approvals, routing and archival
- Interacts with integrated Project Collaborator 2 enabling project-specific navigation of content and workflows
- Interacts with integrated eCMS Content Management and Workflow
- Follows Email Workflow that is integrated with the eCMS database
